Conference Transparency Report:

KubeCon + CloudNativeCon North America 2019

November 18 - 21

KubeCon

CloudNativeCon

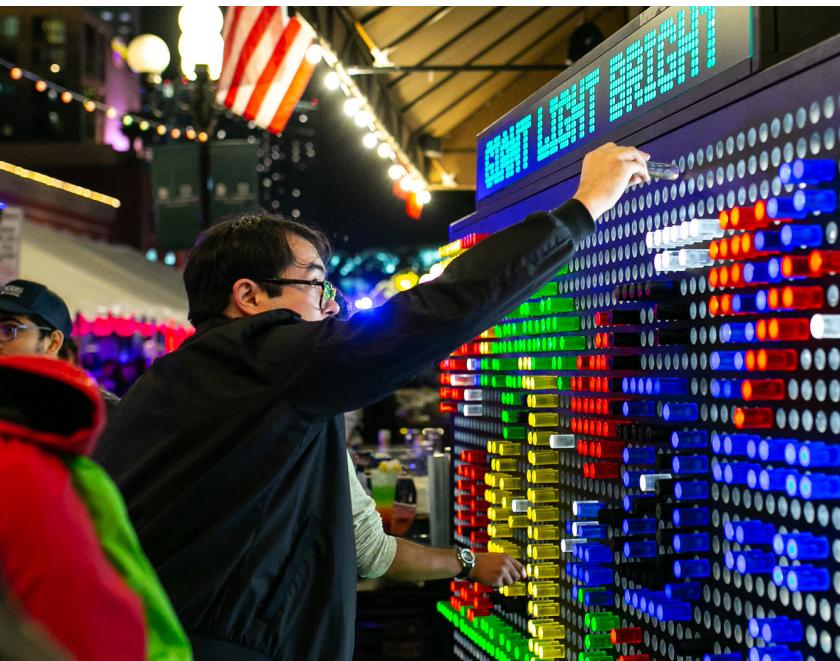

North America 2019

[KubeCon + CloudNativeCon North America 2019](#) was the [Cloud Native Computing Foundation's](#) (CNCF) largest event to date with record-breaking registrations, attendance, sponsorships, and co-located events. The conference had 11,891 registrations, a 48.6% increase over the previous year's event in Seattle. Of all attendees, 35% indicated being a part of an end user organization, an 11% increase from those in attendance at [KubeCon + CloudNativeCon Europe 2019](#).

Of this year's registrants, 65% were first-time KubeCon + CloudNativeCon attendees. The top two reasons respondents cited for attending KubeCon + CloudNativeCon were to learn (48.2%) and to network (39.4%).

Feedback from attendees was overwhelmingly positive, with an overall average rating of 4.2 out 5. Of those surveyed, each respondent said they would recommend the event to a colleague or friend.

PR + Marketing

KubeCon + CloudNativeCon 2019 saw a sharp increase in media and analyst interest, with 154 total attending the event – this was up from 100 media and analyst attendees last year. Publications and analyst organizations represented included DevOps.com, Forbes, Gartner, IDC, The New Stack, Redmonk, SiliconANGLE, TechCrunch, TechTarget, and many others. Media and analyst attendees generated more than 15,000 articles, blog posts, and press releases full of compelling event news covering CNCF and its members, projects, and sponsors.

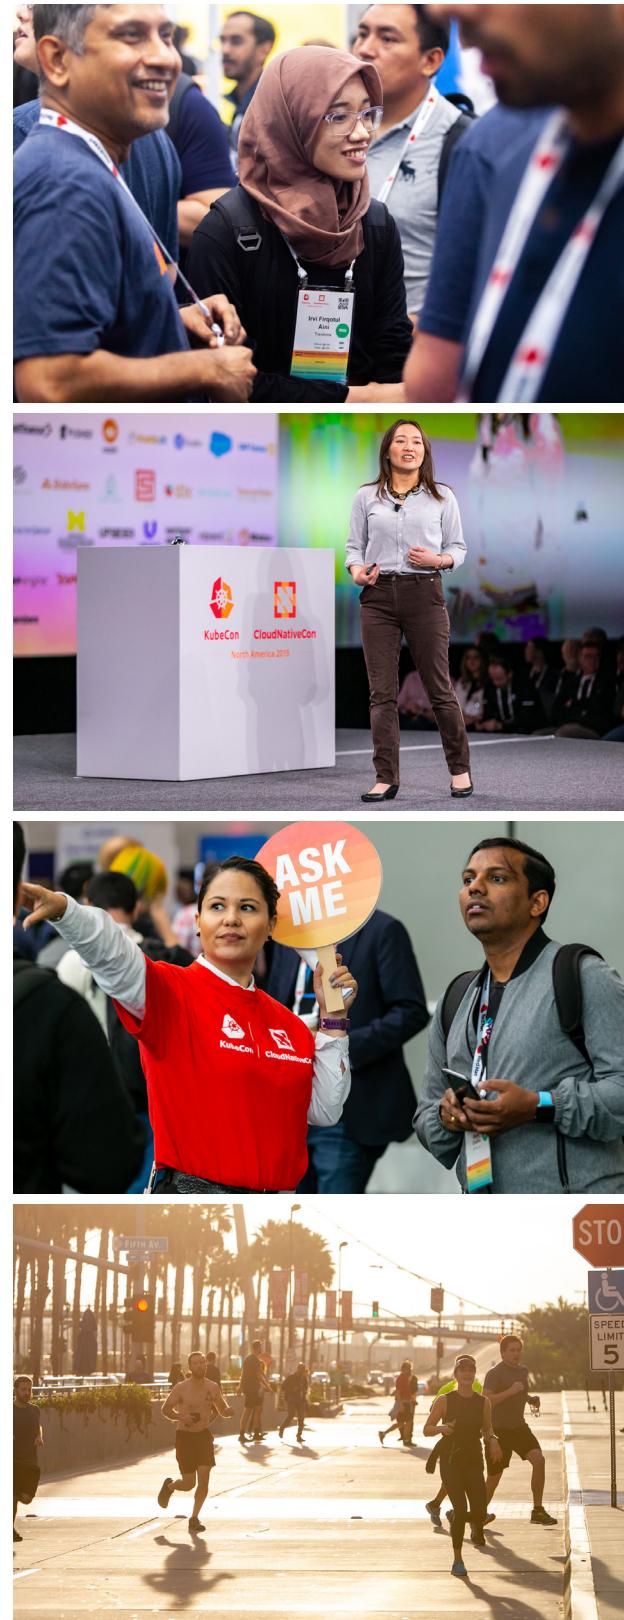

During the event, media and analysts attended a luncheon featuring a closed-session end user panel. CNCF also hosted four media roundtables, which featured CNCF community members and thought leaders discussing the topics of artificial intelligence and machine learning, storage, service mesh, and cloud native security.

We also had our highest number of podcasters recording onsite, including Changelog, Cisco's Cloud Unfiltered, DevOps.com, Google's Kubernetes Podcast, IBM's Developers Podcast, Packet Pushers, Software Engineering Daily, Telesemana, TFIR, TheCUBE, and The New Stack.

Pre-event marketing activities included email marketing, media and analyst relations, organic and paid AdWords, news announcements, promotion to webinar audiences, and social media campaigns. Sixty-eight members and sponsors contributed to the CNCF news package, setting a new record for the number of news announcements at the show. Media partnerships also delivered notable coverage, including 55 pre-show articles, as well as social media promotion, onsite video and audio segments, and feature articles.

Content

KubeCon + CloudNativeCon 2019 received 1,801 submissions, setting a new record for our North American event. For San Diego, there were a total of 2,128 potential speakers who submitted to the call for proposals (CFP), 25% of them representing an end user company, and 75% representing a vendor company. Of these speakers, 352 (16.5%) were accepted to speak at the event, with 35% representing an end user company, and 65% representing a vendor company.

KubeCon

CloudNativeCon

North America 2019

The three-day conference offered attendees 366 sessions, including keynotes, breakout sessions, lightning talks, BoFs, tutorials, and maintainer track sessions. Thirty-six percent of attendees surveyed attended a session in the maintainer track, with many attending the deep dives. Over 55% of attendees participated in one or more of the 34 workshops, mini-summits, and training sessions hosted by community members on Day Zero of the conference.

We also brought thought-provoking speakers to the keynote stage including Vicki Cheung, Lyft; Ian Coldwater, Heroku; Derek Collison, Synadia; Liz Fong-Jones, Honeycomb.io; Khaled Henidak, Microsoft Azure; Kelsey Hightower, Google; Tim Hockin, Google; Maneesh Vittolia and Sriram Komma, Walmart; Bryan Liles, VMware; Ana Medina, Gremlin; Sarah Novotny, Microsoft Azure; Fu Qiao, China Mobile; Azhar Sayeed, Red Hat; and Lenny Sharpe, Target.

The KubeCon + CloudNativeCon talk selection process for the ~225 accepted CFPs and keynotes was managed by the conference co-chairs, Bryan Liles of VMware and Vicki Cheung of Lyft. Brian and Vicki selected 84 subject matter experts to form the program committee, including project maintainers, active community members, and highly rated presenters from past events. Program committee members registered for the topic areas within their expertise and were randomly assigned a subset of relevant talks for review and rate. Based on these reviews, the co-chairs assembled a coherent set of topic tracks and keynotes from the highest-rated talk proposals. We looked to the conference co-chairs and program committee to craft a diverse program that reflected current trends and interests in the cloud native community. Keynote talks were selected by the conference co-chairs from a pool of the highest-rated

KubeCon

CloudNativeCon

North America 2019

CFP submissions. (Note: Here are the [scoring guidelines](#) we provided to the program committee. There is not a one-to-one mapping of topic areas to session tracks.)

In addition to selected talks and keynotes, KubeCon + CloudNativeCon North America included 124 maintainer sessions. These were produced by the maintainers of CNCF-hosted projects to inform users about the projects, add new adopters, and transition some of them from users to contributors. Sessions in the maintainer track were open to each of CNCF's 43 hosted projects, the Kubernetes SIGs and working groups, and CNCF SIGs. Each of these groups was given the opportunity to do one 35-minute Intro and one 35-minute Deep Dive session or an 85-minute combined Intro + Deep Dive session.

Co-Located Events

Thank you to the companies that brought their expertise and additional content to the Day Zero Co-Located Events on Monday before the main conference. There were a total of 34 co-located events that took place throughout the city, many of which donated their proceeds to the Diversity Scholarship Fund. A full list of all co-located events can be found under the demographics section.

Of the 34, CNCF hosted seven of the co-located events:

Cloud Native Security Day | 182 attendees

EnvoyCon | 337 attendees

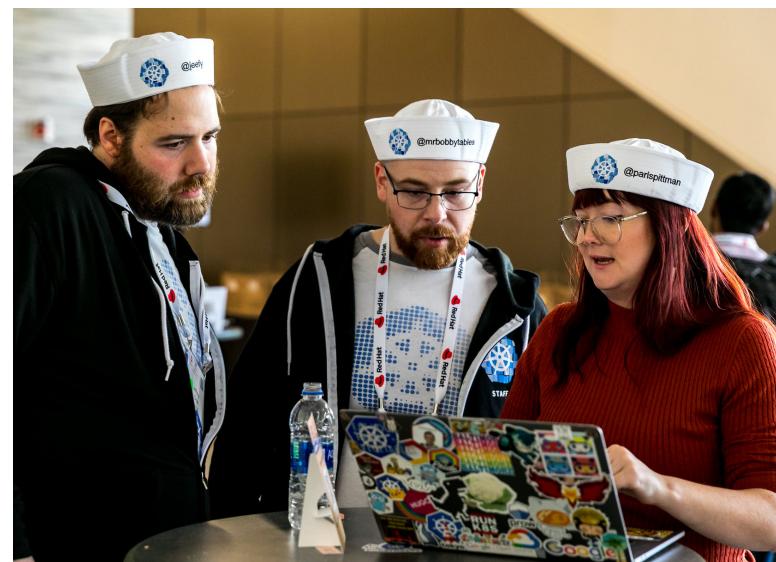

FoundationDB Summit | 125 attendees

Observability Practitioners Summit | 242 attendees

Serverless Practitioners Summit | 107 attendees

ServiceMeshCon | 353 attendees

Kubernetes SIG Storage F2F Meeting | 53 attendees

Diversity + Inclusion

KubeCon + CloudNativeCon North America drew attendees from 67 countries. In San Diego, 11% of attendees were women, an area that CNCF is actively working to improve with enhanced recruiting efforts to ensure a more equitable gender balance. Of the keynote speakers, 58% identified as men, and 42% as women or non-binary/other genders. For track sessions, 84% of speakers identified as men, and 16% as women or non-binary/other genders. Increasing gender diversity and attendance of other underrepresented groups continues to be a priority for CNCF.

CNCF offered travel support to 115 diversity scholarship applicants, leveraging \$177,500 in available funds. This generous scholarship funding was provided by Accenture, AspenMesh, CarGurus, Inc., Cloud Native Computing Foundation, Decipher Technology, Google Cloud, MUFG (Union Bank), Palo Alto Networks, Splunk, and VMware.

To support Diversity Scholarship recipients, VMware sponsored a Career Workshop providing practical tips for LinkedIn, contributing to the community, and the different career paths and opportunities available around Kubernetes. A panel of experienced community members and hiring experts ran the workshop with time for questions and one-on-one conversations.

Our ongoing programming to build a more diverse and inclusive community was again popular with attendees. The EmpowerUs Lunch, sponsored by Comcast, drew 75 participants. More than 50 people participated in the Speed Networking + Mentoring Sessions, a program that connects seasoned members of the community with those interested in learning more about Kubernetes and growing their technical skills. The Diversity Lunch + Hack, sponsored by Google Cloud, featured round table discussions about diversity and inclusion and opportunities to get hands-on with Kubernetes, or pair program on your problem of choice in a safe space with allies. There were 250 people in attendance.

KubeCon

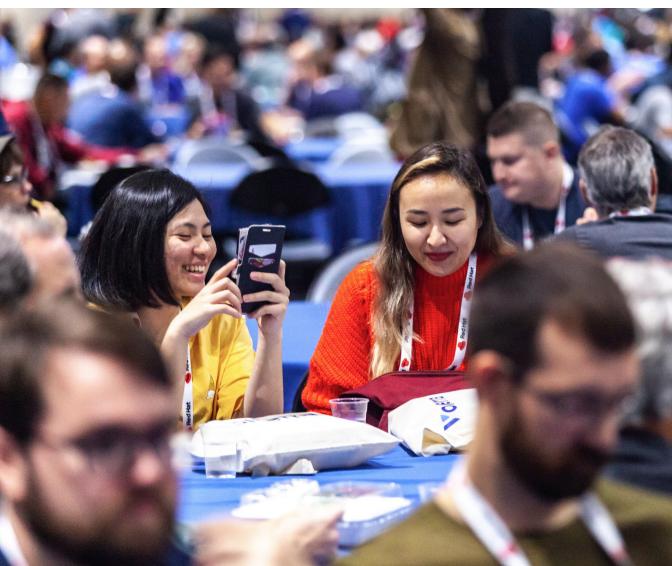

CloudNativeCon

North America 2019

Networking

With networking being listed by survey respondents as one of the top reasons to attend the event, it's no surprise that the evening events were bustling with attendees eager to meet their peers and learn more about the community. The Taco Tuesday Welcome Party + Sponsor Booth Crawl was busy with attendees enjoying food and drinks and connecting with sponsors. More than 6,000 attendees experienced the excitement and entertainment at the historic Gaslamp Quarter All-Attendee Block Party, even during a rare San Diego rainstorm.

Keep Cloud Native Well

While CNCF makes every effort to ensure the comfort, health, and happiness of KubeCon + CloudNativeCon attendees, there may still be some attendees who feel overwhelmed or unhappy while at a bustling live event.

Some of our past attendees have been brave enough to share their experiences, which lead to the creation of the Well-being Working Group (WG). As the largest ever open source conference, KubeCon + CloudNativeCon is breaking new ground, providing an excellent opportunity for us to learn how to take care of attendees at scale.

In San Diego, we provided options for attendees to get active, find quiet time, get fuzzy cuddles, and to discuss mental health. Activities and stations included:

Morning Group Fun Runs

Chair Yoga during lunch breaks

Puppy Pawlooza - a partnership with two local organizations that brought therapy dogs each day

Chair massages

Relaxation Stations

Quiet Rooms

The [Open Sourcing Mental Illness \(OSMI\)](#) Kiosk

KubeCon

CloudNativeCon

North America 2019

Conclusion

We greatly appreciate the feedback we have received to date as it allows us to make KubeCon + CloudNativeCon an amazing experience for everyone. We are continuing to look at ways to make it easier for attendees to learn about the tracks and sessions and to navigate through the conference. One key takeaway is that attendees are looking for even more networking opportunities, so we are actively evaluating ways to build in more networking time and additional networking events in upcoming KubeCon + CloudNativeCon events.

To summarize, with record attendance, growing diversity, and strongly positive feedback from attendees, we feel it is safe to call KubeCon + CloudNativeCon North America 2019 an exceptionally successful event. That said, we look forward to making future events even better. A snapshot of the survey results is below, in addition to social and media highlights.

Media & Analyst Results

Coverage Snapshot:

- CNCF (November 18 – December 9) – 1,534 mentions in media articles, press releases, and blogs, which were then shared 1,767 times across social platforms
- Kubernetes (November 18 – December 9) – 11,546 mentions in media articles, press releases, and blogs, which were then shared 15,286 times across social platforms
- KubeCon + CloudNativeCon (November 18 – December 9) – 1,966 mentions in media articles, press releases, and blogs, which were then shared 2,879 times across social platforms

Coverage Synopsis:

More than 150 reporters and analysts attended KubeCon + CloudNativeCon San Diego, including influential tech reporters like TechCrunch's Ron Miller, TechTarget's Beth Pariseau, ZDNet's Scott Fulton, and The New Stack's Joab Jackson and Alex Williams. Industry analysts came from leading firms such as Gartner, Forrester, IDC, 451 Research, Global Data, ISG, and Aberdeen Group.

KubeCon

CloudNativeCon

North America 2019

Media and analyst attendees sat in on keynotes, evening events, sessions, a luncheon featuring an end user panel, an analyst session featuring a closed-session end user panel, and roundtables on storage, cloud native security, service mesh, and machine learning/artificial intelligence. We also conducted 1:many analyst briefings with top-tier firms Gartner, 451 Research and IDC.

CNCF worked closely with project maintainers, members, and sponsors to include their show news in the news package that was shared with attending media and analysts under embargo. Thanks to these efforts, KubeCon + CloudNativeCon NA 2019 generated over 15,046 mentions in media articles, press releases and blogs between Nov. 18 and December 9 – CNCF with 1,534 mentions, Kubernetes with 11,546 mentions, and KubeCon + CloudNativeCon with 1,966 mentions.

With over six dozen announcements from CNCF and its member companies, coverage surrounding KubeCon + CloudNativeCon can be summed up in a few short phrases:

- "The community's hard work will ultimately simplify Kubernetes and democratize it for wider use"
- "Kubernetes is 'ready' as more enterprises move it into production"
- "KubeCon is arguably the most popular open-source conference of all time"
- "By all accounts, the enthusiasm for K8s will continue unabashed in the foreseeable future as developers love it and enterprises are trying out how to incorporate and tame it"
- "Edge computing is really starting to become interesting"
- "Kubernetes still feels complex to beginners"
- "Operating securely is an important user concern"

Reporters and analysts shared generally positive and constructive feedback on the overall event, and the activities planned for them. In a post-event survey, most media and analysts really appreciated the wide breadth of content. The key takeaway was that 100% would recommend the event to a colleague.

Media Coverage Quote Highlights:

"At 12,000 attendees, this KubeCon ranks as perhaps the largest open-source conference in history. Yet, though enterprises today understand and value open-source technologies, they also depend on an ecosystem of commercial vendors to round out and support Kubernetes and its brethren. The maturation of the commercial offerings, in fact, is a primary harbinger as well as a contributor to the operationalization of cloud-native computing. The vendors leading this charge are not simply complementing open-source projects. They are also connecting such projects to the broader hybrid IT story." - Jason Bloomberg, SiliconANGLE

KubeCon

CloudNativeCon

North America 2019

"KubeCon kicked off with a funny and poignant story calling us all out of the dark and toward the craft of cloud-native. This morning's keynotes revealed well-adopted projects that are available for use ranging from databases to distributed traces, and they gave us a roadmap to understand their growth. Projects mature in the CNCF model by growing adoption, maintainership, and structure in how the project is run. Many will depend on these endorsements to guide their adoption as they pursue coming out of the dark." - Matthew Broberg, OpenSource.com

"Keynote speakers inadvertently signaled a tipping point for Kubernetes and the entire cloud-native computing movement this week at the Cloud-Native Computing Foundation's KubeCon + CloudNativeCon 2019 conference in San Diego." - Jason Bloomberg, SiliconANGLE

"The conference goers are all looking for ways to take advantage of Kubernetes and its ability to automatically deploy, manage, and scale software workloads in the cloud. Ultimately, Kubernetes is accelerating the transition away from legacy client-server technology by making cloud-native software development faster and better." - Tae Kim, Barron's

"Surprisingly, networking had a significant presence in the second-day keynotes. They included discussions around a dual v4/v6 stack—which still surprises me to this day that not everything is full dual-stack enabled from day one— network service meshes, and perhaps one of the most extensive keynote demonstrations at KubeCon." - Roy Chua, FierceTelecom

"There were more security sessions and more security vendors present at this KubeCon than at any prior one. There's a lot of interest in security out there, noted a cloud-native security panel made up of Liz Rice (VP open source engineering, Aqua Security), Michael Ducey (director of community and evangelism, Sysdig), Sabree Blackmon (formerly a senior security engineer at Docker), Gareth Rushgrove (director of product management, Snyk), and Maya Kaczorowski (product manager, Google security team). However, Rushgrove, who is also in the Cloud Native Computing Foundation (CNCF) Security special interest group, also said that a lot of the interest he sees in that group is in fairly basic topics, such as image scanning and general automation. A great deal of work has gone into security around Kubernetes: I asked the panelists where work remained to be done. The group had no shortage of answers." - Gordon Haff, Enterprisers Project

"San Diego became the host for one of the largest industry events of the year - KubeCon + CloudNativeCon. With over 12000 attendees and 100s of vendors from the cloud native ecosystem, this conference was undoubtedly the biggest gathering of the industry." - Janakiram MSV, Forbes

The buzz is mounting around 5G as the next generation of cellular network technology, and telco operators are taking a closer look at what cloud and containers can provide.
- Mark Albertson, SiliconANGLE
